## **Our Mission**

*To facilitate and enhance the community's response to HIV/AIDS.*

## **Our Objectives**

-  To promote community participation in HIV/AIDS education and research
-  To facilitate the development of social, behavioural and epidemiological research on HIV/AIDS in Hong Kong and the neighbouring regions
-  To enhance the development of quality HIV/AIDS education programmes
-  To provide an avenue for local and international collaboration in the fight against HIV/AIDS

## **Message from Ms Victoria KWONG Chairperson of the Red Ribbon Centre Management Advisory Committee**

2019-2020 is an indifferent year. Be it a social event or an emerging pandemic of Coronavirus Disease 2019 (COVID-19) at the end of the year, it has greatly impacted the daily lives of Hong Kong people. COVID-19 is an emergency public health incident of international concern and is unprecedented. Living in them, I would say a majority of Hong Kong people's behavior and habits of these months, more or less have some changes. . . without going out, decrease social gatherings, wear masks and hand hygiene; as well as mainland and international entry restrictions. This change of social behaviours relies on experts, such as social scientists, to thoroughly study and make conclusions. But will this behavior of staying at home affect those in need? Are there people with a high risk of HIV who have not sought an HIV test?

The Center for Health Protection (CHP) of the Department of Health reviewed the local HIV/AIDS situation on 25 February 2020 that a total of 565 cases of HIV infection were reported to CHP in 2019, whereas the local HIV/AIDS situation on 3 March 2021 that a total of 505 cases of HIV infection were reported to CHP in 2020. Looking at the number of infection cases in 2018, 2019 and 2020, it is 624, 565 and 505; using the data of these three years as a comparison, it seems that there is a downward trend. I am pleased if these numbers of infections reflect the public's understanding of AIDS, know the importance of prevention, and protect themselves by taking adequate preventive measures and early HIV testing. Yet, let us guard against adopting a complacent attitude. What is the reason behind figures? Will the social determinants in 2019 and 2020 have a certain impact?

As far as I know, the objectives of implementation of public health measures are to promote and protect the health of the community. However, one of the key factors that contribute to the success greatly depends on the participation of the public. In other words, when applies to HIV, if without good drug adherence, safer sex, stay away from drugs..., a better result could not be achieved no matter how effective the pre-exposure prophylaxis ( PrEP ) is, and how advance the HIV drugs. In Hong Kong, sexual transmission remains the major mode of HIV transmission. Members of the public should use condoms consistently and properly so as to reduce the risk of acquiring HIV (and other sexually transmitted infections).

I commend the staff of the Red Ribbon Centre for their immense effort over the past two years of making use of the online platform to disseminate information while unable to reach the public. plus their continuous development of high-quality population-based and target-based HIV / AIDS programmes. With the participation and support of non-governmental organisations and local communities, the programmes are strengthened to the needs of targeted populations and increased community coverage. The production of " In Life We Move Forward " TV announcements and radio announcements, has brought about encouragement and positive messages. The establishment of " HIV Self-test" website had provided a platform for private, rapid and free HIV testing at home for MSM. Seamless care is continued as an experienced nurse counsellor will provide further information and counselling in case the 'ready to test' or 'already tested' person wishes to.

**2019-2020 is a year overwhelmed with all sorts of messages. No matter how we responded to changes, as the Chairman of the Red Ribbon Centre Management Advisory Committee, I still advocate "safe sex", "regular testing" and " drug adherence". Yet, the prevention of HIV spread is still the individual's firm and unwavering behaviours.**

## **Director's report for the year 2019-2020 by Dr Billy HO**

In the previous five years from 2016 to 2020, we had witnessed a decreasing number of annual HIV reports since the peak recorded in 2015. Although a definitive epidemiologic trend, so to speak, was far from established, we were hopeful and felt that we could be at a turning point.

There was no way we would be lulled into complacency. Right from the start, we in Red Ribbon Centre were determined to hunker down and redouble our efforts. In accordance with the Recommended Strategies by the Hong Kong Advisory Council on AIDS, we further extended our reach to ethnic minorities and primary health care professionals in these two years.

When talking about the latest challenges in HIV prevention and care, it is inevitable not to mention the COVID-19 pandemic since its emergence more than a year ago. The pandemic has strained health systems and exposed gaps in public health almost everywhere. It has led to the implementation of different social distancing measures, including movement restriction around the world, and yet it has also brought people closer together in the virtual world.

While the social events and COVID-19 pandemic has led to interruption of conventional HIV testing services intermittently, fortunately, the Centre timely rolled out its first and second phase of HIV self-testing study in September 2019 and December 2020 respectively and have helped fill part of the gap. The outcome of this important study should shed light on how HIV self-testing could be leveraged to increase the proportion of HIV positive individuals successfully diagnosed. Indeed, early and widespread testing cannot be overemphasised. This is instrumental in our quest to reach the 90-90-90 target as set by UNAIDS. In fact, now that treatment is known to both prevent transmission and save lives, promotion of testing is simply the right thing to do, regardless of targets or strategy recommendations.

At the time of World AIDS Day 2019, the Centre launched a publicity campaign through TV, radio and advertisements in railway carriages to disseminate exactly this message. In 2020, an HIV-STI conference for primary health care professionals was successfully held. This conference originated from our strategic consideration to recruit first line health care providers toward increasing the coverage of diagnosis and also their understanding and sensitivity regarding the vulnerable populations of HIV. While conducting online educational activities and health promotion has become a new norm, the Centre has also converted a lot of health education activities to online and symposia into webinars during this period of time to continue bringing updated knowledge of HIV/AIDS to the general public and health care professionals. We believe that these sorts of training and educational activities should continue to enhance their awareness and knowledge about HIV infection, their sensitivity to the health needs of sexual minorities, and to cultivate a non-discriminatory health care as well as social environment.

The Centre continued to join hands to collaborate with community stakeholders in order to implement swift response to tackle any potential longer term impact throughout the pandemic. Despite all the challenges in 2019 and 2020, the mutual support among one another and our NGO partners have all combined to make the years unforgettable. All professionals in the HIV field have been working relentlessly with devotion and commitment not only to maintain essential services, but also to develop new and innovative strategies to expand access to testing and other prevention options. We continue to be hopeful and are already making plans for 2021-22.

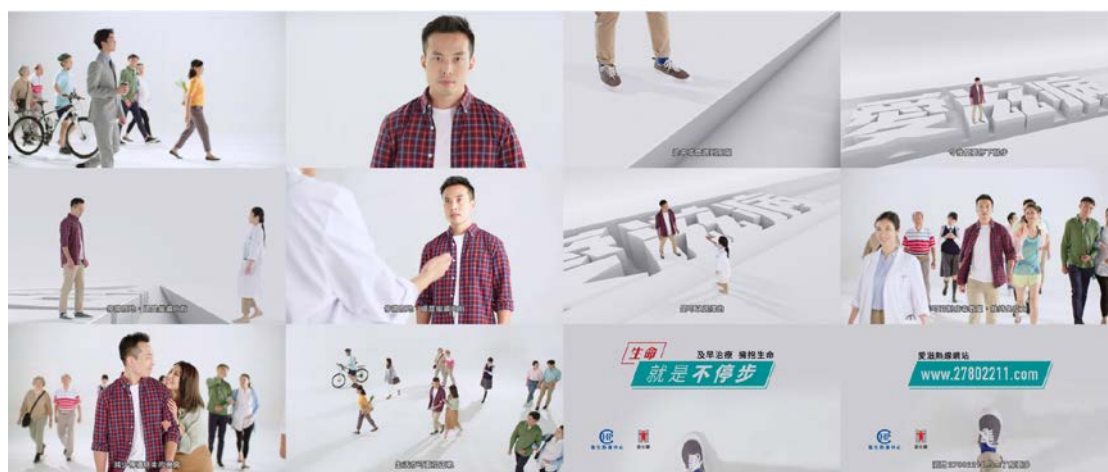

## Photo Album – 2019-2020 Red Ribbon Centre Activities tidbits

### Promotion of Awareness and Acceptance Activities

#### World AIDS Campaign 2019: “Early Treatment for a Healthy Life”

To raise the awareness on HIV prevention and echo to the World AIDS Day on 1 December, the Red Ribbon Centre launched a series of promotion including Announcements in the Public Interest (APIs) and promotion posters. The APIs, both in television and radio produced in Cantonese, Putonghua and English were broadcasted in TV and radio on 1 December 2019 with advertisement in MTR trains to enhance the effect of publicity.

The storyline of the APIs is about HIV infection as an obstacle along life path, may tell one to stop. One choose to have early HIV treatment with antiretroviral therapy can get his life back on track.

## World AIDS Campaign 2020: Global Solidarity, Shared Responsibility

As an event under the World AIDS Campaign 2020, the 'HIV-STI Conference for Primary Health Care Professionals' was jointly held by the Red Ribbon Centre under the Special Preventive Programme (SPP) and the Hong Kong College of Family Physicians on 28 November 2020. The aim of the Conference is to provide participants with updates on treatment and prevention of HIV and STIs and enhance their knowledge of and sensitivity towards sexual minorities. About 580 healthcare workers attended the Conference online, most are from Hospital Authority and Department of Health.

To echo the World AIDS Day, Red Ribbon Centre appealed the public to wear red ribbons provided by Red Ribbon Centre for free on 1 December to show their care and concern for those living with HIV/AIDS and their support to the people and organizations working on HIV prevention.

Furthermore, with the online promotion, the Centre introduced a series of HIV and safer sex education materials which targeted on the youth. Knowledge of HIV & STIs was enriched in a funny approach, youth would be able to know how to protect themselves from HIV infection.

## HIV Awareness and AIDS Hotline Promotion – through outreach activities

The HIV awareness and AIDS hotline promotion was held at Kwun Tong, Sham Shui Po, Tin Shui Wai, Causeway Bay and Wan Chai on 14 February, 11 October, 17 December, 24 December 2019 and 18 September, 3 November 2020 respectively. Free condoms and giveaways were distributed. Around 16,800 members of the public were reached.

## AIDS Hotline promotion in Ethnic Minorities

Ethnic minorities is one of the target populations in HIV/AIDS prevention and health promotion. As usual, the Red Ribbon Centre held a promotion activity in Mongkok, Causeway Bay and Central on 5 May 2019 by distributing giveaways with two AIDS Hotline providing pre-recorded messages in Tagalog, Vietnamese, Thai, Hindi, Indonesian, Nepali and Urdu. With these 2 hotlines, the ethnic minorities can get health information easily and conveniently without language barriers. Around 6,500 participants were reached.

## Online promotion education targeting Ethnic Minorities

To study the local situation of HIV infection among ethnic minorities, SPP of the Department of Health (DH) commissioned a survey “HIV risk behavioural survey for ethnic minorities (Filipinos and Indonesians) in Hong Kong 2019” which was conducted from May to September 2019. Based on the result, health messages about HIV and sexual transmitted infection (STI) prevention were disseminated via 6 popular ethnic minorities web pages during period of June to August 2020. Health knowledge of HIV/STI prevention were enhanced together with related services for health examination. Around 709,340 attendants were reached.

## HIV Prevention Programmes for Men who have sex with men (MSM)

### Hong Kong Lesbian and Gay Film Festival (HKLGF) 2019 and 2020

Since 2006, the Centre started supporting the screening of HIV and Lesbian, Gay, Bisexual and Transgender (LGBT) related movies and organising HIV prevention activities in collaboration with the HKLGFF Society. In 2020, Red Ribbon Centre specifically invited “Drag Queen” to shoot a promotion video for promoting HIV self-testing pilot study. It was showed before screening of each film in order to increase the coverage of MSM and transgender women of HIV testing.

## Pink Dot 2020

Red Ribbon Centre joined the first time live streaming of Pink Dot 2020. It acts as a good platform for reaching sexual minorities with health promotion. This year the Centre participated the event by playing the video of promoting safer sex and HIV testing. The messages of AIDS hotline and HIV prevention were also promoted.

The image displays two screenshots. The top screenshot is the Pink Dot 2020 website, featuring a pink header with the logo and navigation links: 節目內容 PROGRAMME, 粉紅小店 STORE, 支持我們 SUPPORT US, 關於我們 ABOUT US, and 贊助 SPONSORS. Below the header, there are two rows of logos for participating organizations, each with a 'Video' and 'Web Site' button. The logos include: 愛無界 Love Unbounded, Migrants Pride 2020 (Let's Fight Covid, Overwork, Vulnerability, Inequality, Discrimination, UNITE with PRIDE), 女同學社, 同·一線 PRIDE Line, 沙馳四號 SACH-IV, BGCA (香港小童基金會 性向照顧計劃), elements, 跨青時刻 QUARKS, and 紅絲帶中心 Red Ribbon Centre.

The bottom screenshot is a Facebook page for Red Ribbon Mission (@RedRibbonMission). The page features a profile picture of two pink ribbons, a cover photo of a 'PINK STAGE' event, and a post titled '即將開始的直播視訊' (Upcoming Live Stream) for today at 7:30 PM. The post lists performers: 謝志宏 SHAN TSI HO, 鄭志豪 CHENG ZHI HO, 馮國輝 FONG KOK HUI, 李卓恩 LI CHU AN, 余思賢 YU SI HAN, and 潘麗嫦 PAN LEE CHANG. The page also shows a 'Red Ribbon Mission 的直播預告' (Red Ribbon Mission Live Stream Preview) from yesterday at 1:20 PM.

## HIV Self-Test study

In order to explore the feasibility and acceptability of HIV self-testing, a designated website was launched for online recruitment of MSM and test kit ordering from September 2019 to June 2020. The participant could order the self-test kit from the website and would be reimbursed upon result and photo upload within 14 days after ordering.

HIV self-test by oral fluid was found to be well accepted by local MSM community as reflected by the satisfaction rate from the participants and showed interest in ordering again. A total of 1,426 test kits were ordered in this study.

The image shows a screenshot of the HIV Self-Test website and four promotional posters. The website interface includes a header with the Department of Health logo and navigation tabs for 'Introduction', 'Self-Test Kit', 'Usage', 'Results', 'Privacy', 'FAQ', and 'Online Purchase'. The main content area features a 'Usage' section with instructions and a video player for the 'HIV Self-Testing Demonstration Video'. Below the website screenshot are four posters illustrating different testing methods: 'Free Testing' (a man in a yellow shirt), 'Home Testing' (a man in red shorts), 'Private Testing' (a man in a grey suit), and 'Rapid Testing' (a man in a white tank top). Each poster includes a list of features and contact information.

**HIV 自我檢測**  
秘密驗 快速驗 免費驗 自家驗

**使用方法**

■ 請確定你準備好進行測試，否則不要打開包裝袋；  
■ 切勿在檢查前30分鐘使用口腔護理產品（如漱口水或牙膏）；  
■ 切勿在檢查前15分鐘飲用含有酒精的飲品；  
■ 採集口腔液體前請先漱口或刷牙或其他清潔身體的部位；  
■ 請於一個乾燥物在30分鐘內不受干擾、私隱度高、光線充足的地方進行此操作；  
■ 準備一袋可以貯存20至40分鐘的封裝膠袋；  
■ 若出現使用困難，請先重覆。

## Capacity building and Networking activities

The Red Ribbon Centre offers development opportunity for students who are interested in work field of public health especially on HIV. In 2019, students from the Jockey Club School of Public Health and Primary Care, The Chinese University of Hong Kong had joined the programme. Throughout the 4-week placement, the students had gained exposure to job natures of health promotion . Literature reviews on needs of transgender men and women were conducted and the results were presented to the Centre staff.on 18 July 2019

## Training Workshop on Basic Knowledge on HIV/AIDS & STIs for NGO Staff

In order to strengthen the knowledge of HIV and STIs of NGO staff, a 2-day training workshop named “Training Workshop on Basic Knowledge of HIV/AIDS and STIs for NGO staff” was held on 4 and 11 April 2019 in Centre of Health Protection theatre.

The content of day 1 was focused on HIV and STIs knowledge and the clinical services provided by DH. The content of day 2 was focused on experience sharing by frontline staff. Different healthcare professionals and frontline staffs from various NGOs were invited to share their experience on providing services to different target groups such as MSM, female sex workers, clients with chemsex, transgender people and ethnic minorities. The workshop provides a learning platform especially for NGOs new comers to have a basic understanding on the topic of HIV/AIDS. 3 sessions in 2-day training attracted a total of 59, 57 and 60 participants respectively.

## Visitors from overseas and mainland China

RRC received visitors from the Mainland and overseas agencies, and provided a platform to enhance the collaboration between local workers and overseas counterparts in HIV prevention. There were totally 9 visitors from Fujian Family Planning Association joined with The Family Planning Association of Hong Kong on 27 November 2019.

## Project Inventory in the year 2019-2020

### Promotion of Awareness / Acceptance: Community-based
